

C.5 Software Requirements

C.5.1 The Contractor shall provide the Wolverine Common Software Library (WCSL) and documentation to the Government with the delivery of the Wolverine D2T2 variant. As a minimum, this shall include the following:

- a. A complete set of design documentation for the WCSL
- b. Interface Control Documents that describe programming interfaces
- c. A distribution CD to be used by other training device contractors
- d. All other documentation necessary to support the WCSL by other Contractors and the Government. The Government and Contractor will mutually agree the format, no later than 30 Sep 01.

The documentation shall be in sufficient detail that PM Wolverine can adapt the WCSL into other Wolverine training devices, such as, the Driver's Mission Trainer (DMT) being developed by Lockheed Martin.

C.5.2 The Contractor shall provide the Wolverine D2T2 variant with the capability to display a list of all cautions and warnings that may be generated by the Wolverine. This list shall be a simple scrollable text window that shows each of the cautions and warnings.

C.5.3 The Contractor shall integrate aural cues, as they occur during the launch retrieve sequence. The Government will provide the sound files and the Contractor shall integrate into the Wolverine D2T2 variant.

C.6 Contractor Support

C.6.1 The contractor shall provide technical support for the use and maintenance of the WCSL and Wolverine D2T2 for a one-year period after delivery of the Wolverine D2T2 variants. Upgrade of the WCSL will not be required except for the correction of problems discovered during the first year of use. Travel will be limited to a total of four trips to recipient sites of the Wolverine D2T2 variant (Ft. Hood, TX); the Driver's Mission Trainer contractor in Orlando, FL, or the training base Ft. Leonard Wood, MO.
